Preface	v
1 Preliminaries	1
1.1 Spaces of integrable, continuous and absolutely continuous functions	1
1.2 Convex functions and Jensen's inequalities	6
1.3 Exponential convexity	9
1.4 Opial-type inequalities	10
2 Fractional integrals and fractional derivatives	15
2.1 The Riemann-Liouville fractional integrals	15
2.2 The Riemann-Liouville fractional derivatives	22
2.3 The Caputo fractional derivatives	34
2.4 The Canavati fractional derivatives	40
2.5 Relations between different types of fractional derivatives	43
2.6 Composition identities for fractional derivatives	47
2.6.1 Composition identities for the Riemann-Liouville fractional derivatives	48
2.6.2 Composition identities for the Caputo fractional derivatives	52
2.6.3 Composition identities for the Canavati fractional derivatives	56
3 Jensen-Opial type inequalities	61
3.1 The Godunova-Levin and related inequalities	61
3.2 Mean value theorems and exponential convexity	66
3.3 Applications to Stolarsky type means	72
3.4 Multidimensional generalizations of Opial-type inequalities	77
4 Generalizations of the Mitrinović-Pečarić inequalities	85
4.1 The Mitrinović-Pečarić inequality for convex functions	85
4.1.1 Mean value theorems and exponential convexity	86
4.1.2 Applications to Stolarsky type means	91

4.1.3	Opial-type inequalities for fractional integrals and fractional derivatives	94
4.2	The Mitrinović-Pečarić inequality for relative convex functions	100
4.2.1	Mean value theorems and exponential convexity	102
4.2.2	Applications to Stolarsky type means	106
4.2.3	Opial-type inequalities for fractional integrals and fractional derivatives	108
4.2.4	Opial-type equalities for fractional integrals and fractional derivatives	116
5	Generalizations of Opial-type inequalities for fractional derivatives	123
5.1	Inequalities with fractional derivatives of order α and β	124
5.2	Inequalities with fractional derivatives of order α , β and $\beta + 1$	131
5.3	Inequalities with fractional derivatives of order α , β_1 and β_2	136
6	Extensions of Opial-type inequalities for fractional derivatives	159
6.1	Extensions of the Fink Opial-type inequality	159
6.2	Extensions of the Agarwal-Pang Opial-type inequality	172
6.3	Extensions of the Alzer Opial-type inequalities	180
7	Inequalities for integral operators with a kernel and applications to a Green function	219
7.1	Inequalities for integral operators with a kernel	219
7.2	Opial-type inequalities using a Green function	224
8	Weighted integral and discrete Opial-type inequalities	235
8.1	Integral inequalities in one variable	235
8.2	Multidimensional integral inequalities	241
8.2.1	Improvements of Poincaré-type inequality	242
8.2.2	Improvements of Wirtinger-type inequality	249
8.2.3	Improvements of Sobolev-type inequality	251
8.2.4	Improvements of inequalities due to Pachpatte	254
8.3	Multidimensional discrete inequalities	256
8.3.1	Improvements of the Agarwal-Pang inequality I	257
8.3.2	Improvements of the Agarwal-Pang inequalities II and III	260
	Bibliography	267
	Index	272
