<b>Preface</b>	<b>v</b>
<b>1 Basic results and definitions</b>	<b>1</b>
1.1 Convex functions . . . . .	1
1.2 Exponentially convex functions . . . . .	4
1.3 The Gamma function and the Gauss hypergeometric function . . . . .	6
1.4 Fractional integrals and fractional derivatives . . . . .	7
<b>2 Steffensen's inequality</b>	<b>13</b>
2.1 Introduction . . . . .	13
2.2 Weaker conditions . . . . .	18
2.3 Gauss' inequality . . . . .	22
2.4 Inverse Steffensen's inequality . . . . .	26
2.5 The Jensen-Steffensen inequality . . . . .	28
2.6 Discrete Steffensen's inequality . . . . .	34
2.7 Steffensen pairs . . . . .	42
<b>3 Generalizations of Steffensen's inequality</b>	<b>47</b>
3.1 $L^p$ generalizations . . . . .	47
3.2 Pečarić, Mercer and Wu-Srivastava generalizations . . . . .	55
3.3 Cerone's generalizations . . . . .	68
3.4 Multidimensional and measure spaces generalizations . . . . .	78
3.5 Steffensen's inequality and $L^1 - L^\infty$ estimates of weighted integrals . . . . .	96
3.6 Steffensen type inequalities involving convex functions . . . . .	98
3.7 Steffensen type inequalities for $s$ -convex functions . . . . .	103
<b>4 Generalizations of Steffensen's inequality via the weighted Montgomery identity</b>	<b>107</b>
4.1 Generalizations via the weighted Montgomery identity . . . . .	107
4.2 Generalizations via $n$ weight functions . . . . .	117
4.3 Generalizations via Fink identity and related results . . . . .	129

<b>5 Generalizations of Steffensen's inequality via Taylor's formula</b>	<b>135</b>
5.1 Generalizations via Taylor's formula . . . . .	135
5.2 Generalizations by the one-point integral formula . . . . .	141
<b>6 Generalizations of Steffensen's inequality by interpolating polynomials</b>	<b>147</b>
6.1 Generalizations by Lidstone's polynomial . . . . .	147
6.2 Generalizations by Hermite's polynomial . . . . .	153
6.3 Generalizations by an Abel-Gontscharoff polynomial . . . . .	159
<b>7 Steffensen type inequalities for fractional integrals and derivatives</b>	<b>167</b>
7.1 Fractional Steffensen type inequalities . . . . .	167
7.2 Generalized fractional Steffensen type inequalities . . . . .	179
<b>8 Means related to Steffensen's inequality</b>	<b>193</b>
8.1 Error terms for Steffensen's inequality . . . . .	193
8.2 New generalized Steffensen means . . . . .	198
8.3 Gauss–Steffensen means . . . . .	209
8.4 Note on the inequality of Gauss . . . . .	215
8.5 $n$ –exponential convexity of generalizations of Steffensen's inequality . . . . .	218
8.5.1 $n$ –convex functions . . . . .	218
8.5.2 $(2n)$ –convex functions . . . . .	224
<b>9 Applications of Steffensen's inequality</b>	<b>229</b>
9.1 Extension of Hölder's inequality . . . . .	229
9.2 Improvement of an extension of Hölder type inequality . . . . .	234
9.3 Generalizations of Iyengar's inequality . . . . .	240
9.3.1 Weighted generalizations of Iyengar's inequality . . . . .	243
9.4 $a(x)$ –monotonic functions . . . . .	250
9.5 Other applications . . . . .	254
<b>Bibliography</b>	<b>257</b>
<b>Author Index</b>	<b>267</b>
