Preface	i
1 Definitions and Basic Results	1
1.1 Hilbert-type Inequalities with Conjugate Exponents	1
1.2 Hilbert-type Inequalities with Non-conjugate Exponents	8
1.3 Hardy-type Inequalities	12
2 Some Classes of Hilbert-type Inequalities	19
2.1 More Accurate Discrete Hilbert-type Inequalities	19
2.1.1 Extension to the Non-conjugate Case	20
2.1.2 Applying the Hermite-Hadamard Inequality	22
2.2 Multidimensional Version of the Hilbert-type Inequality	25
2.2.1 Integral Case	25
2.2.2 Discrete Case	33
2.3 A Unified Treatment of Half-discrete Hilbert-type Inequalities	42
2.3.1 The Conjugate Case and the Best Constants	45
2.3.2 Some Examples and Applications	49
2.3.3 Refined Half-discrete Hilbert-type Inequalities	51
3 Hilbert-type Inequalities on Time Scales	57
3.1 On Time Scales	57
3.2 Hilbert-type Inequalities	58
4 A Class of Hilbert-type Inequalities Obtained via the Improved Young Inequality	65
4.1 Preliminaries	65
4.2 Improved Hilbert-type Inequalities	67
4.3 Applications	69
4.3.1 Connection with the classical Hilbert inequality	69
4.3.2 A few examples with the classical Hardy inequality	72

5	Hilbert-type Inequalities Involving Some Means Operators	75
5.1	Two-dimensional Inequalities	75
5.1.1	Integral Inequalities	76
5.1.2	Discrete Inequalities	87
5.1.3	Applications and Concluding Remarks	97
5.2	Half-discrete Versions	100
5.2.1	Half-discrete Inequalities in the Non-conjugate Case	100
5.2.2	Reduction to Conjugate Case and the Best Constants	103
5.2.3	On Half-discrete Operators Arising from Hardy-Hilbert Type Inequalities	114
5.3	Extension to a Multidimensional Case	115
5.3.1	Reduction to the Conjugate Case and the Best Constants	118
5.3.2	Some Examples and Remarks	130
6	Hilbert-type Inequalities Involving Differential Operators	135
6.1	Integral Forms	136
6.1.1	Applications	144
6.2	Associated Half-discrete Forms	146
6.2.1	Half-discrete Inequalities in the Non-conjugate Case	146
6.2.2	Reduction to Conjugate Case and the Best Constants	149
6.3	Multidimensional Cases	154
6.3.1	Inequalities with Conjugate Parameters. The Best Possible Constants	156
6.3.2	Applications and Concluding Remarks	162
7	Hilbert-type Inequalities for Hilbert Space Operators	165
7.1	The Hilbert Operator Inequality	166
7.2	The Best Possible Constants	171
7.3	An Improvement of the Hilbert Operator Inequality via the Hermite-Hadamard Inequality	174
8	A Relation Between Hilbert-type and Carlson-type Inequalities	179
8.1	Generalizations on \mathbb{R}_+^2	180
8.1.1	A Discrete Inequality	181
8.1.2	An Associated Integral Form	185
8.2	Multidimensional Integral Inequality	189
9	On Some Hilbert-Pachpatte-type Inequalities	199
9.1	More Accurate Hilbert-Pachpatte-type Inequalities	200
9.2	The Fractional Derivatives and Applications to Hilbert-Pachpatte Type Inequalities	207
	Bibliography	213
	Index	221
